

nuclear weapons. Once again, he reminded us all that while nuclear weapons will not be eliminated overnight, the United States must be a leader and take the first steps toward elimination of these weapons. As the founder of the Global Security Institute, he was able to forge ahead with this dream of abolishing nuclear weapons.

With his passing, the peace and nuclear disarmament community certainly lost a true friend and leading voice. On behalf of the thousands of citizen groups that will continue to campaign for the elimination of nuclear weapons, I thank him for his ground breaking work in this arena. And, everyone should know, we will continue in this shared quest to make the world safe from the dangers of nuclear weapons.

TRIBUTE TO LATE SENATOR ALAN CRANSTON

HON. DAVID DREIER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 6, 2001

Mr. DREIER. Mr. Speaker, I wish today to join my colleagues in paying my respects to one of California's longtime, dedicated public servants, the late Senator Alan Cranston, who passed away last New Year's Eve.

Alan Cranston's career of public service spanned almost half of the 20th century. He was first elected State controller of California in 1958, and was sent to the Senate by California voters in 1968. He served there through 1993. Throughout his career, Cranston dedicated himself to a range of important causes—seeking to strengthen federal environmental laws, to expand assistance to the disadvantaged in society and to bolster civil rights. His commitment to arms control led him to work closely with President Reagan for the Intermediate Range Nuclear Force Treaty, even though the two agreed on little else. Senator Cranston was also respected for his advocacy of the interests of his State—for farmers, film makers, aerospace companies, financial institutions and independent oil producers.

Throughout his career and throughout his life, Alan Cranston distinguished himself with his hard work, his tenacity and his self-discipline. He was an Olympic-class runner who kept himself in shape through the end of his life. He took the time to make himself an expert in whatever issue he was working on. Whether it was arms control, housing, or the views and concerns of his Senate colleagues, Alan Cranston took the time to master the subject. It was this discipline that made him an extremely effective party-builder, coalition builder, advocate and legislator. That dedication and that commitment deserve our respect.

DEATH OF FORMER MAYOR JOHN V. LINDSAY

HON. MAJOR R. OWENS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 6, 2001

Mr. OWENS. Mr. Speaker, throughout the neighborhoods of New York, millions mourn the death of former Mayor John Lindsay. He is still remembered as the great patron of community empowerment who provided the opportunity for the people on the bottom to enter the mainstream of New York politics as well as civil service and government employment.

John Lindsay was a highly visible and articulate idealist and advocate for greater inclusion of minorities in the American dream. Although his direct impact on policy and practice never moved beyond New York City, he belongs in the category with Robert and John Kennedy and Franklin Roosevelt.

Assuming great political risks, Lindsay was one of the few leaders in the nation who seriously adopted Lyndon Johnson's "Maximum feasible participation of the poor" policy. His administration made a Herculean effort to institutionalize power-sharing down to the local level. Instead of siphoning off dollars and resources from federal programs like the Community Action Program and the Model Cities initiative, Lindsay added city support and thus increased his own tax and budget burdens.

With ignorance and incompetence, the people on the bottom sometimes betrayed their mayoral advocate; however, it was the lack of vision and the resistance within the ranks of the city's organized machine Democrats which blocked the realization of a new progressive base for the governing of New York City. Unfortunately, Lindsay never sought to build a movement or even his own partisan machine. But as a solo force, a lone Achilles of New York politics, he left a lasting legacy of new leadership within the poor and minority communities.

After serving as a commissioner appointed by John Lindsay, I was elected to the New York State Senate in 1974. When I entered the legislature for the first time, I noted that every minority member of the legislature had previously been in some way supported by the Community Action Program or the Model Cities Program, both empowerment vehicles sponsored by John V. Lindsay.

New York City mourns a great visionary leader and champion of the poor and powerless.

THE LINDSAY TRUMPET STILL SOUNDS

For the Great John Lindsay
The grave is not a period,
But a colon:
The good comes
Flowing endlessly afterwards
In offspring never seen,
Achievements never footnoted.
John Lindsay's trumpet sounds
In the heads
Of unknown urban soldiers;
The posterity of the powerless
Now hear the beat of new drums;
The smothering of grassroots fervor
Is now a gasping scheme;
Heroes from the neighborhoods

May still match the Lindsay dream.
A Socrates for empowerment,
He spawned Platos and Aristotles;
Somewhere his Alexanders
Are mobilizing new young armies.
For the Great John Lindsay
The grave is not a decaying period
But a bright blossoming colon:
The movement is not yet murdered,
Its fervor only temporarily stolen;
The rivers of righteous anger
Again are fully swollen.
Alive nailed to an unjust cross
Big John bled away alone;
With resurrections of his disciplines
New Lindsay miracles of the City
Can still be carved in stone.

IN MEMORY OF MILTON ROEMER—
ONE OF THE WORLD'S LEADING
PUBLIC HEALTH ADVOCATES
AND HEALTH POLICY THINKERS

HON. FORTNEY PETE STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 6, 2001

Mr. STARK. Mr. Speaker, one of the world's most thoughtful health policy experts and advocates, Dr. Milton L. Roemer has passed away. His brilliance and insights will be sorely missed by all those who were his students and who had the privilege of working with him.

Few of us in Congress ever get a law named after us, and even fewer people throughout the world get a law of nature or science named after themselves—but Roemer's law is a law that all of us in health policy and finance must live and deal with daily. In popular language, Roemer's law is "build it and they will come"—which he postulated way before the movie was ever dreamed of. In health policy, it means that in an insured population, if you add beds to a health care facility, they will get filled. In medicine and health care, supply can drive demand. The implications for health policy, costs, and financing are key to many of the problems we face and will be facing in the decades to come.

Roemer's law is just one of the innumerable contributions he gave the world. Since earning his medical degree 60 years ago, he worked on public health problems in 71 nations, published as sole author 20 books[!!!], co-authored 12 other books, and 430 articles. The doctor was obviously possessed of energy and talent almost beyond imagination.

Dr. Roemer earned the MD degree from New York University in 1940, along with a masters' degree in sociology from Cornell University in 1939, and a public health degree from the University of Michigan in 1943.

As a medical officer of the New Jersey State Health Department, he supervised 92 venereal disease clinics, as they were called in 1943. During World War II as a member of the commissioned corps of the US Public Health Service, he served as Assistant to the Chief Medical Officer of the War Food Administration and Associate in Medical Care Administration to the Chief of the State Relations Division. His 1948 book, written with F.D. Mott Rural Health and Medical Care was the first to analyze systematically rural health care needs and services in the United States.
